The Vienna FFA Chapter took a field trip to the University of Missouri Wurdack Research Farm near Cook Station on Thursday, Oct. 5.

The tour included 10-15 stops where guides spoke and demonstrated different things about agriculture.

Some of the stops included erosion, pollution, firearm safety, pesticide safety, beef quality and artificial insemination.

One advisor (Mr. Alan Freeman), 29 members, and the infamous Mr. Bill Parker (our veteran bus driver), attended Wurdack from our school. There

were approximately 30 other schools that attended the tour throughout the day.

The trip was fun as well as educational. This is only one of our many FFA activities that will be happening this year. I thank you for reading this article and hope you choose to read further articles about the FFA.
