

Weber wins second in state competition

Maries R-I student Nathaniel Weber took second place in the Missouri Future Problem Solving Program's Scenario Writing competition in the senior division.

Nathaniel chose to write about organ donation. His writing was entitled "Isn't Progress Fun?" and was based 20 years in the future.

The scenario is an original writing based on one of three futuristic topics chosen for the Missouri Problem Solving Program each year. The senior division is for grades 10-12. Nathaniel is only a sophomore, so it is all the more impressive that he received second place overall in this stiff competition.

The Maries R-I Missouri Future Problem Solving Program is under the direction of Sherry Bingaman.
